

Your restaurant is quietly losing money. *Let's find it — free.*

Abbas Zoeb — Owner, Wok & Karahi (Spring, TX). A fellow restaurant owner, not a vendor — with the engineering team big chains rely on. **15+ years** in hospitality; our own place profitable every year it's been open.

WHERE INDEPENDENTS QUIETLY BLEED MONEY

- 1 The delivery apps take 15-30% of every order** — and walk off with your customer. You're renting guests you could own.
- 2 The phone rings through the rush with no one free to answer** — missed orders and reservations you never even saw.
- 3 A dozen tools that don't talk** — and **no real strategy**, the way the big chains have one. Money leaks where you don't have time to look.

We make you money *before* we take a dollar.

We come to you, find every leak, and do all the work. **You only pay once you're saving — guaranteed.** We're hand-picking just **five founding restaurants** for our performance-first pilot, with **founding pricing locked for life**. No commissions from any vendor — our only side is yours.

Scan it. See your money leaks in *2 minutes* — free.
