

The whole tech & strategy team the big chains have — *for your restaurant. A to Z.*

Abbas Zoeb — Owner, Wok & Karahi (Spring, TX). A fellow restaurant owner, not a vendor — backed by the engineering team big chains rely on. **15+ years** in hospitality; our own place profitable every year it's been open.

FROM STOPPING THE BLEED TO STAYING AHEAD — WE COVER ALL OF IT

- 1 Stop the bleed.** Cut the apps' 15-30% commissions, answer every call 24/7, end the tablet chaos, and claw back the money the apps quietly owe you.
- 2 Win back & grow.** Turn app guests into your own repeat customers, climb your reviews the smart way, get found on Google *and* AI search, and open a high-margin catering channel.
- 3 See clearly & stay ahead.** One real view of your numbers, an actual strategy like the chains run, and a team that keeps you ahead as everything keeps changing.

We make you money *before* we take a dollar.

We come to you, find every leak, and do all the work. **You only pay once you're saving — guaranteed.** We're hand-picking just **five founding restaurants** for our performance-first pilot, with **founding pricing locked for life**. No commissions from any vendor — our only side is yours.

Scan it. See your money leaks in **2 minutes** — free.
