

THE FULL DETAILS

Everything behind the pitch — for when you want to dig in.

The numbers, the plays we run, the whole toolbox, and exactly what it costs. No need to read it all — just book the free call and we'll walk you through what matters for you. Download as a PDF →

HOW IT WORKS

You shouldn't need tech skills to run a modern restaurant.

Our philosophy is simple: the big chains win with technology and strategy you don't have time to learn. We bring it — the know-how, the industry playbook, and the team — and put it to work for you. You stay in control, you own your data, and we only get paid when you win. Here's exactly how it goes — tap any step:

1 You book a free call — we listen first —

We get to know your restaurant and check that we're a fit. We'll show you the kinds of things we do for places like yours — but we won't prescribe anything until we've actually studied *your* business.

2 If it's a fit, we come to you +

3 We hand you a clear plan — work and cost +

4 You start saving — then we get paid +

5 We prove it in your real numbers +

You run the restaurant. We run the technology and the strategy behind it — and stay your team for the long run.

42%

of US restaurants didn't turn a profit last year (*National Restaurant Association*).

~3%

what it costs to take an order on your own site — versus up to 30% the delivery apps keep.

5–9%

more revenue for an independent with each one-star rating bump (*Harvard Business School*).

28%

only 28% of operators say tech ever improved their profit — we're built to be the exception (*National Restaurant Association*).

HOW WE'D GROW YOUR RESTAURANT

Use what works. Fix what leaks. Own what's yours.

We don't fight the apps or rip out what's working — we use them smarter. Tell us what you run, and we'll show you exactly where we'd start:

WHICH SOUNDS LIKE YOU?

Takeout or counter

Sit-down restaurant

2–10 locations

These are the high-impact plays — but there are **100+ tools** out there, and most owners don't know which (if any) fit them. [See what fits your restaurant →](#)

WHAT'S OUT THERE — AND WHAT FITS YOU

There's a tool for everything. You only need the right few.

We track **100+ restaurant tools across 22 categories** — and most owners have never heard of the handful that would actually move their numbers. Our free 2-minute finder asks a few questions about your place and shows you what likely fits, what it tends to cost, and what to skip.

WHAT IT COSTS

No leap of faith. You see the numbers first.

Whether you need a one-time fix or an ongoing team, we scope it to your restaurant — and you never spend a dollar on faith.

You see the numbers first

Before anything starts, you get the plan, the cost, and the expected return in plain dollars. If the math doesn't work for you, we don't move.

You pay only after you benefit

Setup is a clear one-time fee. For strategy work we get paid only once the savings show up in your real numbers — tracked month over month from your POS and the apps. Month to month, no lock-in.

No vendor commissions, ever

If we connect you to a service, our fee comes from you — never a kickback from the vendor. So the only thing we ever recommend is what's right for your restaurant.

Ready when you are. [Book your free call →](#)

GOOD QUESTIONS

What owners ask us first.

Is this just one person?

+

What happens on the free call?

+

Do you disappear after it's built?

+

Can't I just do this myself?
